

JETLUBER LUBRICATION UNIT

Jetluber is a device that lubricates the optical fiber cable during fiber blowing. The unit is air-powered and works with a pre-equipped V2 or V3 Jetting machine.

Jetluber comes standard with an air valve connector and connection hose to fiber blowing machine.

LUBRICATION UNIT FOR JETTING V2 & V3

- Support the cable installation
- Easy to use
- Lightweight
- No electricity needed
- Quick connection to machine
- Easy drain
- Adjustable amount of lube
- Low air consumption
- Compact size
- Protected in hard case
- No noise

TECHNICAL DATA

- 
Fluid pressure:
16 Bar
- 
Amount per stroke:
1 ml
- 
Adjustable amount:
0,5 - 80 ml
- 
Air consumption:
<10 l/min
- 
Weight:
6,3 kg
- 
WxHxD
330 x 150 x 300 mm
- 
Tank
500 ml
